

Secure a Sharp Proper Lid Closure

SECURE
a SHARP

CLOSED POSITION

In the closed position, the lid is sealed and puncture-proof. The cap should not feel loose at this point, if the cap feels loose, twist it further.

LOCKED POSITION

In the locked position, the lid is sealed, puncture-proof and will not open during transport. The cap should be twisted to the farthest position to securely lock the container.

The molded arrows on the cap should align with the markings on the container lid to indicate closed or locked position.
